SARO GLOBAL

About Saro Global

SARO GLOBAL Established in 2010 with backing of 43 years effort in supplying architectural hardware and aim of becoming a reliable and comprehensive source of Quality, Elegant and Cost-effective architectural hardware in Iran. Dream of SARO GLOBALs' members have always been establishing such a committed organization which brings practicality and art to residential and commercial buildings for creation of more quality and comfortable environments. Working for making this dream true is a continuous practice of this company. We hope to be able to have a considerable share in supplying proper and decent goods and services for our customers.

SARO GLOBAL as an umbrella brand covers two high quality main brands named **SARO** and **LOMBARDI**. SARO products are Practical, Professional and cost-effective. Lombardi products are Luxury and suitable for longtime use.

درباره ساروگلوبال

مجموعه ساروگلوبال با بهرمندی از ۴۳ سال تلاش در جهت عرضه یراق آلات و با هدف تبدیل شدن به یک منبع مورد اطمینان و جامع برای ارائه محصولات با کیفیت، زیبا و مقرون به صرفه در زمینه یراق آلات معماری در سال ۱۳۹۰ در ایران شکل گرفت. همواره رویای اعضای ساروگلوبال راه اندازی سازمانی متعهد برای ارائه محصولات کاربردی و هنری که وسیله ای برای ایجاد محیطی با کیفیت‌تر و راحت تر در ساختمانهای تجاری و مسکونی میگردند، بوده است و تلاش برای به واقعیت رساندن این رویا فعالیتی مستمر در این سازمان است. امیدداریم که بتوانیم سهم بزرگی در تامین محصولات و خدمات مطلوب و شایسته به مشتریان خود را داشته باشیم.

ساروگلوبال به عنوان یک برند چتری در برگیرنده ی دو برند با کیفیت به نامهای **سارو** و **لومباردی** می باشد. محصولات سارو کاربردی، تخصصی و مقرون به صرفه هستند و محصولات لومباردی لوکس و در عین حال مناسب برای استفاده دراز مدت می باشند.

IRAN at a glance

IRAN has one of the richest art heritages in world history and encompasses many disciplines including architecture, painting, weaving, pottery, calligraphy, metalworking and stonemasonry. There is also a very vibrant Iranian modern and contemporary art scene.

Iranian architecture generally displays great variety in both structural and aesthetic, developing gradually and coherently out of earlier traditions and experience. Without sudden innovations, and despite the repeated trauma of invasions and cultural shocks, it has achieved individuality distinct from other countries. Its paramount virtues are several: a marked feeling for form and scale; structural inventiveness, especially in vault and dome construction; a genius for decoration with a freedom and success not rivaled in any other architecture.

SARO GLOBAL is eager and willing to have an outstanding role in development of Iranian Architecture Art and sharing that with the world.

Door Handle

As you approach the entry of a home or business, the entry door and hardware is often the first impression you have of someone···indeed, Door Handle is often the first "contact" you have with your guests! Throughout the home, handle is seen at every turn, on powder rooms, libraries, and family living quarters. From Italian Renaissance to Bauhaus, from Louis XV to Greek Revival, from ancient to modern··· we have every style you'll need to set your project apart.

Door Cylinder

The door cylinder is the heart of any door and has top priority when it comes to protection against break-ins. Despite their importance, many locking cylinders based on outdated technology are still being fitted – with no protection against tampering, with no emergency or hazard functions, etc. Today's door cylinders are high-quality, high-tech products with versatile and effective features. Each is a miniature masterpiece in itself and must ensure reliable locking for years to come with precise interaction between the body, pins, balls and springs.

Panic Exit Devices
Safety, Reliability and Aesthetic

SARO can offer a wide range of panic exit devices, each with different design and technical characteristics, but all sharing a common feature: their suitability for heavy human traffic environments, guaranteeing maximum security and safety while complying with all the applicable US standards.

Constantly on the lookout for new, innovative solutions, SARO has developed this range ever further perfecting an already proven, reliable product with the addition of new performance characteristics and a bold, eye-catching design. The high-impact new look highlights the product's strong construction and reliability while maintaining the iconic design features of this range - enabling to use products from different lines in the same environment.

Access Controls

Electronical & Electrical solutions

Waterproof Keypad

While you look for a real waterproof product, the first thing you need to check is the IP rating. If you see the IP68, congratulation, you find a qualified one! However, if the IP rating is lower than that, it is definitely not the waterproof product that you are looking for.

SARO

Keypad
Waterproof
KCW01

Specification :

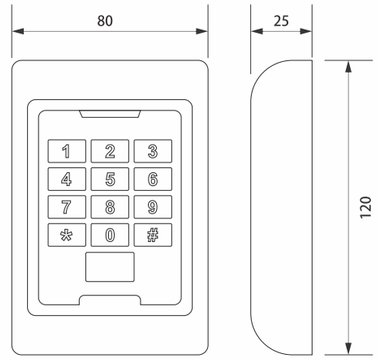
- Environment Conforms to IP68
- Operating Voltage : 12V DC ± 10 %, Current ≦ 30 mA
- User Capacity : 2000 Card, 2000 Code
- Card reading distance : 1-8 cm
- Operation Mode : Card, Code, Card + Code
- Working Frequency : 125 KHz
- Wiegand Interface - Wiegand 26/34 bit
- Weight : 0.55 kg
- Material : Die-Casted Zinc Alloy
- Operating Temperture : -35°C ~ 60°C
- Type of ID card : EM-ID card

About IP68 rating

The IP68 can be considered as a key point while people select the products. Without it, it is very hard to know the level of the protection of the product. In fact, you might buy a so called waterproof product, which could not tell you, how deep or how long the product can be used in the water. That is why we need the IP rating, which can let the consumer know the condition of the product.

Dimensions :

All of dimension in millimeters



Item Number : 012601002

SARO

Keypad
Moist Resistant

KC01

MOIST RESISTANCE

Specification :

- Waterproof IP55
- Operating Voltage : 12V DC ± 10 %, Current ≦ 100 mA
- Operating Temperture : 0°C - 60°C
- Card reading distance : 1-15 cm
- User Capacity : 1000 cards, 1000 code
- Type of ID Card : EM-ID card
- Weight : 0.11 kg
- Material : ABS

About IP55 rating

Complete protection against contact with live or moving parts inside the enclosure. Protection against harmful deposits of dust. The ingress of dust is not totally prevented, but cannot enter in an amount sufficient to interfere with satisfactory operation of the machine.
Water projected by a nozzle against the enclosure from any direction shall have no harmful effect.

Faucet Series

Stainless Steel Faucets

Lombardi®

Kitchen Faucets

Water is used in cooking the world over. We need running water in the kitchen up to 90 times each day. We take it so much for granted that we often don't think of water when we hear the word 'kitchen'. We think of well-filled refrigerators, aromas wafting from the oven and of the tables laid ready for dinner. But we forget what works hardest in the kitchen: the kitchen faucet. Something that is used this frequently must be durable - and since kitchens are increasingly becoming living spaces, it also has to look good. That's why ergonomics, functionality, aesthetics and durable finishes are so important in LOMBARDI kitchen faucets.

All of our LOMBARDI faucets contain the KEROX cartridges

About KEROX cartridges

The key to Kerox' outstanding reputation is its multi-stage quality control system that tracks each product through the entire production process.

These stages include:

- Incoming inspection for outsourced cartridge components
- thorough inspection and press trials of mold tooling before being approved for production use.
- Testing of individual components prior to assembly
- Testing at sub-assembly stages
- Final testing of completed cartridges (100%)

These basic quality guidelines are then carefully applied to the following specific components and assemblies:

Ceramic Discs: The discs, made from select European raw material, are 100% inspected with an Automatic Optical Inspection (AOI) system, providing exacting analysis of all surfaces, edges and main dimensions. Process Control techniques are used throughout the manufacturing processes to carefully monitor and keep under control such product characteristics as surface roughness, flatness and contact surface area ratio.
These steps are critical in assuring leak resistance, low torque, low operating forces, and long term reliability in every Kerox cartridge.

Plastic Components - dimensional exactness is assured by computer controlled injection molding processes, as well as thorough inspection procedures.

Outsourced Components - a strict incoming inspection procedure allows only dimensionally correct parts to enter the production flow.

Tooling - Kerox maintains an on-going monitoring of the condition of its tooling to guard against possible degradation of quality. Tooling is kept in first-rate condition at all times.

Sub-assembly testing - each cartridge is checked in every sub-assembly stage and approved before being allowed to enter the next production phase. Before leaving the plant each Kerox cartridges goes through a last inspection.

Final Testing - After assembly, each cartridge is tested to be leak-free using a pneumatic process that provides far greater sensitivity than water. After successful testing, cartridges are stamped with a confirming serial number that can be used for future tracing in the event of a field problem.

Bathroom Sink

Stone Resin Sinks

Lombardi Bathroom Table **Stone Resin**

Bello

Stone Resin

Lombardi Stone Resin is a blend of mainly unsaturated polyester resin and calcium carbonate amongst others.The finish is usually glossy white and comes with a gel coating of approximately 1-2 mm thickness. The material is a very waterproof and can be easily cleaned with common detergents.

Easy Maintenance

Regular cleaning with common non-abrasive cleaning agents will secure a long surface quality.Our material is resistant to deterioration and minor damages due to wrong handling can even be easily repaired.

Non-porous

Lombardi Solid Surface is 100% non-porous and therefore unaffected by fluctuating moisture, ingression or humidity.this secures a long product life and a smooth appearance over many years.

Niloofar

Stone Resin
Lombardi Stone Resin is a blend of mainly unsaturated polyester resin and calcium carbonate amongst others.The finish is usually glossy white and comes with a gel coating of approximately 1-2 mm thickness. The material is a very waterproof and can be easily cleaned with common detergents.

Easy Maintenance
Regular cleaning with common non-abrasive cleaning agents will secure a long surface quality.Our material is resistant to deterioration and minor damages due to wrong handling can even be easily repaired.

Non-porous
Lombardi Solid Surface is 100% non-porous and therefore unaffected by fluctuating moisture, ingression or humidity.this secures a long product life and a smooth appearance over many years.

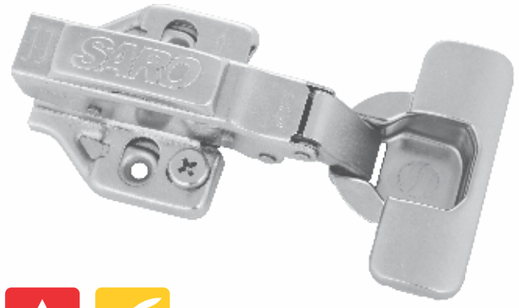
Cabinet Fittings

A collection of cabinet and furniture hardware

SARO
Hydraulic Cabinet Hinge
2-way 3D
HC-104



2-way 3D

Soft-Closing Hinge with 3D Adjustment

Item Number : 010308002

There are many reasons to choose hinges from SARO : High quality, durability, easy assembly, comprehensive programme, variety of special solutions and an attractive design. What's new : 2-way 3D - the hinge with closing action integrated into the body-providing silent and effortless-real and fully 3D adjustment.

Specification :

- Full overlay
- Closing time : 5~7 second
- Opening Angle : 110 degree
- Depth of hinge cup : 11.3 mm
- Diameter of hinge cup : 35 mm
- Door thickness : 14~23 mm
- Finish : Nickle Plated

Package Include :

- Cup and body cover
- Mounting screws

Special Features :

- Tool-free door to cabinet assembly and removal.
- 3-dimensional adjustment with relevant mounting plate.
- With convenient spiral screw depth adjustment.
- All metal hinge, nickle plated.
- Compatible with existing mounting plates
- Silent and effortless closing of Cabinet and furniture doors

General sales conditions

Prices:

All listed or quoted prices are Ex-work and they do not include V.A.T. and other costs such transport, packing and etc... Prices can be varied without notice. The applicable selling prices are the ones stated in the quotation at the time of ordering. Possible printing errors in the price lists and quotations shall not represent a cause for claim.

Consignments:

The goods travel at the customer own risk and charge. In absence of clear instructions relative to the means of transport, consignment will be done by the means of transport considered to be the most appropriate, without any responsibility of SARO GLOBAL.

Orders:

All purchase orders shall bear the correct article codes and description of requested items, and will be accepted only if forwarded by fax or e-mail. In any case every order shall be subject to approval and acceptance of the Supplier.

Delivery:

The delivery time shall be purely an indication, and as such, any delay in the delivery shall not constitute cause for claim or for the contract cancelation. The goods shall be considered sold and delivered Ex-work. The Consignee shall check the goods upon their arrival to its premises and verify the good condition of packing. In case of any damage to the packing, the consignee shall submit the necessary reservation and claim to the carrier, and send copy of the relevant documentation to the Supplier.

Claims:

Claims should be lodged within eight days from receipt of the goods. No goods can be returned without notice and in any case without express consent of the supplier. The returns authorized by SARO GLOBAL shall be sent to our address, accompanied by a delivery note stating the exact item code, as well as the date and number of the relevant sale invoice.

Payments:

All payments shall be made directly to SARO GLOBAL within the agreed terms and maturity dates. In case of delays in the payments due, interests on arrears will be charges. Furthermore the non-payment of one or more due invoices will entitle the supplier to delay or cancel the orders in hands.

Products:

Any variant required on the products listed in the catalog, will be looked at as a “special request”, and SARO GLOBAL should be asked first about the feasibility, price and minimum order quantity required. The supply of “special product” shall then be subject to the customer’s acceptance of the order acknowledgement.SARO GLOBAL shall have the right to modify the products and vary the prices without notice.

Controversy and property rights:

For any dispute arising in connection to these sales conditions the place of jurisdiction is the Court of Tehran. It is hereby agreed that the Supplier shall have the property right over the goods sold till they are fully paid for by the customer.
